Arrival manager for EuroScope

A simple arrival manager plugin for EuroScope. Uses the position predictions provided by EuroScope to visualize the arrival flow for a given airport or waypoint.

Usage

The AMAN-display will appear in a separate window once the plugin has been loaded.

.aman show	*opens the window if it's been closed*
.aman add WAYPT1	*adds a timeline for a single waypoint*
.aman add WAYPT1/WAYPT2	*adds a split view where aircraft inbound for WAYPT1 are shown on the left side and inbounds to WAYPT2 are shown on the right side*
.aman add WAYPT1/WAYPT2/WAYPT3/...	*adds a timeline showing inbounds for multiple waypoints*
.aman add <waypoints> VIA1,VIA2,VIA3,...	*adds a timeline with call signs colored based on which via-waypoint the aircraft is coming from*
.aman del X	*removes a timeline where X is the position of the timeline you want to remove, counting from the left (1 = the leftmost)*
.aman clear	*removes all timelines*
